

**Assistant/Associate/Full Professor of Surgical Oncology
Louisiana State University School of Veterinary Medicine**

Come work in a vibrant academic oncology program in one of the country's most diverse and thriving Veterinary Schools! Louisiana State University has an open clinical or tenure-track faculty position for a surgical oncologist to join our team of two medical oncology faculty (one full-time, one consultant), one radiation oncology faculty, four residents (three medical oncology and one radiation oncology), and five full-time oncology nurses. We are presently recruiting an additional two medical oncology faculty and one radiation oncology faculty, with the goal of expanding the team to three full-time medical oncologists and two radiation oncologists. We have a busy and growing combined clinical service that allows for comprehensive patient care that is supported by a diagnostic imaging service with a new CT scanner, clinical pathology, anatomic pathology, five anesthesiologists, and a full complement of other specialty services. Our 21EX linear accelerator with on-board imaging including cone beam CT is capable of SRT, IMRT, 3D conformal, and electron radiation treatments. We have a dedicated chemotherapy suite, compliant with USP 800 standards.

In addition, we are rapidly building up a clinical trials program and have clinical and laboratory support staff that are equipped to facilitate additional clinical trials. We are also members of the Comparative Oncology Trials Consortium (COTC). We're excited to add another faculty member to our dynamic group! LSU Vet Med has also recently established a Comprehensive Cancer Center and received \$11 million in COBRE funding for pre-clinical cancer models.

The surgical team enjoys state-of-the-art equipment including a laparoscopy/thoracoscopy tower, intraoperative fluoroscopy, vessel sealing devices, laser, smoke evacuation, and a Catheter lab.

Questions are welcome, and they can be directed to the Search Committee Chair, Bonnie Boudreaux at bbrugmann@lsu.edu.

More information about LSU:

LSU is located adjacent to the mighty Mississippi river in the capital of Louisiana, Baton Rouge. Approximately 1 hour from New Orleans, there is an abundance of music, cultural, and food festivals in the region. In addition, southern Louisiana offers opportunities for a variety of outdoor activities, such as boating, fishing, kayaking, and hiking.

The Veterinary Teaching Hospital at LSU houses specialty services in the disciplines of anesthesia, cardiology, ophthalmology, zoological medicine, oncology, internal medicine, dermatology, surgery, diagnostic imaging, and integrative medicine and physical rehabilitation. A brand-new hospital, Stephenson Pet Clinic, opened in June 2022 and houses five of our outpatient services and a brand new clinical skills lab space.

The School of Veterinary Medicine has also invested in teaching. Our students and faculty now have a brand new modern open floor plan library with many conference rooms that is one of the jewels in our crown. Additional recent constructions include the years 1, 2, and 3 classrooms, as well as a large modern multipurpose lab used by instructors for a variety of teaching purposes including clinical skills.

We strive to create and maintain a diverse and inclusive environment for faculty, students, and staff to thrive in. Our mission and strategic plan include pillars in diversity, equity, and inclusion. Our LSU SVM Diversity Office provides support for the mission and facilitates the objectives of our mission through personal development programs for our entire community. All of our students receive DEI education within the curriculum. We currently have the most diverse staff, second most diverse faculty, and a student body that has grown from 7% to over 30% underrepresented minorities within the last five years. Our SVM leaders in the Diversity Office are members of the diversity committees of two national organizations, the AAVMC and the SEVEC (southeast veterinary education consortium) and the SVM diversity committee is driven by the faculty, students, and staff of the school.
